Wharfedale ward had the highest life expectancy rates for both males and females.

Life expectancy - males

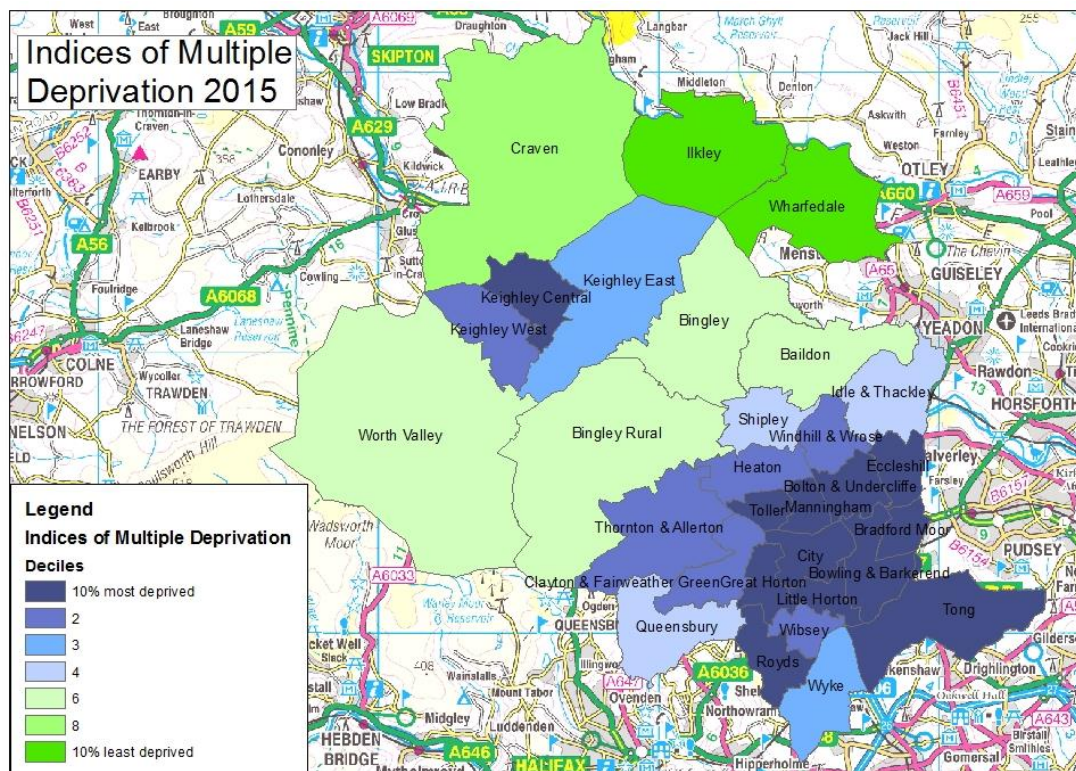

Life expectancy - females

Deprivation

The following map shows wards in Bradford District ranked by deciles of deprivation. Wards which are identified as being more deprived are shown in blue and wards identified as being less deprived are shown in green.

The Indices of Deprivation 2015 were published in September 2015 at district and lower layer super output area. The indices are calculated using 37 separate indicators, organised across seven distinct domains of deprivation (income, employment, education skills and training, health deprivation and disability, crime, barriers to housing and services and living environment) which are weighted and combined to calculate the Index of Multiple Deprivation 2015.

The results have now been aggregated to ward level and this shows that 12 of the District's wards are amongst the 10% most deprived wards in England and two wards are amongst the 10% least deprived wards in England. Manningham is consistently the most deprived ward for most of the indices and Wharfedale is consistently the least deprived ward for most of the indices.

Bowling & Barkerend is ranked 2nd of 30 wards in the District for the Index of Multiple Deprivation where 1 is the most deprived and 30 is the least deprived. Bowling & Barkerend is in 3rd place for income deprivation, 3rd place for employment deprivation and 4th place for education, skills and training deprivation.

More about deprivation

The data about deprivation has been aggregated to ward level. Although this data provides a description of the District's wards, this description does not apply to every person who lives there. Many non-deprived people live in deprived areas, and many deprived people live in non-deprived areas.
