16.8% of employees in Queensbury work in professional occupations, 13.4% work in associate professional and technical occupations and 12.6% work in skilled trades.

The top three industries employing people living in Bradford District are: retail and wholesale trade (17.7%), human health and social work activities (15.4%) and education (10.6%)

17.1% of employees in Bradford District work in professional occupations, 12% work in elementary occupations and 11.5% work in associate professional and technical occupations.

Health and disability

The 2021 census asked people about their health, whether they have any disabilities and if they act as unpaid carers for anyone else.

In Queensbury 82.8% described their health as 'Good or very good' and 5% described their health as 'Bad or very bad'. Wharfedale had the highest percentage of people who described their health as 'Good or very good' (86.8%). Manningham and Tong wards had the joint highest percentage of people who described their health as 'Bad or very bad' (7.6%).

80.6% of Bradford District residents described their health as 'Good or very good' and 6% described their health as 'Bad or very bad'

The census asked people whether they had any physical or mental health conditions or illnesses lasting or expected to last 12 months or more. It also asked whether any of these conditions or illnesses reduced the respondent's ability to carry out day-to-day activities.

In Queensbury, 83.5% responded that they do not have any illnesses or disabilities which limit their day-to-day activities. 7.3% consider that their activities are limited a lot and 9.2% feel that their activities are limited a little. Wharfedale had the highest percentage of people who do not have any illnesses or disabilities which limit their day-to-day activities (86.5%). Tong has the highest percentage of people who consider that their activities are limited a lot (10%) and Wyke has the highest percentage who feel that their activities are limited a little (11.6%).

82.9% of Bradford District residents do not have any illnesses or disabilities which limit their day to day activities, 8% find their activities are limited a lot and 9.1% find their activities are limited a little.

The Census took place during the coronavirus (Covid 19) pandemic. This may have influenced how people perceived and rated their health and therefore may have affected how people chose to respond.

Unpaid care

The census asked people whether they look after or give any help or support to anyone with a long-term physical or mental health conditions, or any problems relating to old age.

In Queensbury, 91% do not provide any unpaid care, 4.2% provide 19 hours or less per week and 2.8% provided more than 50 hours per week. Residents in City ward were least likely to provide unpaid care (93.1%), whereas at the other end of the scale 5.6% of Baildon residents provide 19 hours or less per week and 3.6% of Wyke residents provide more than 50 hours per week.

91.1% of Bradford District residents do not provide any unpaid care, 3.9% provide 19 hours or less per week and 2.8% provided more than 50 hours per week

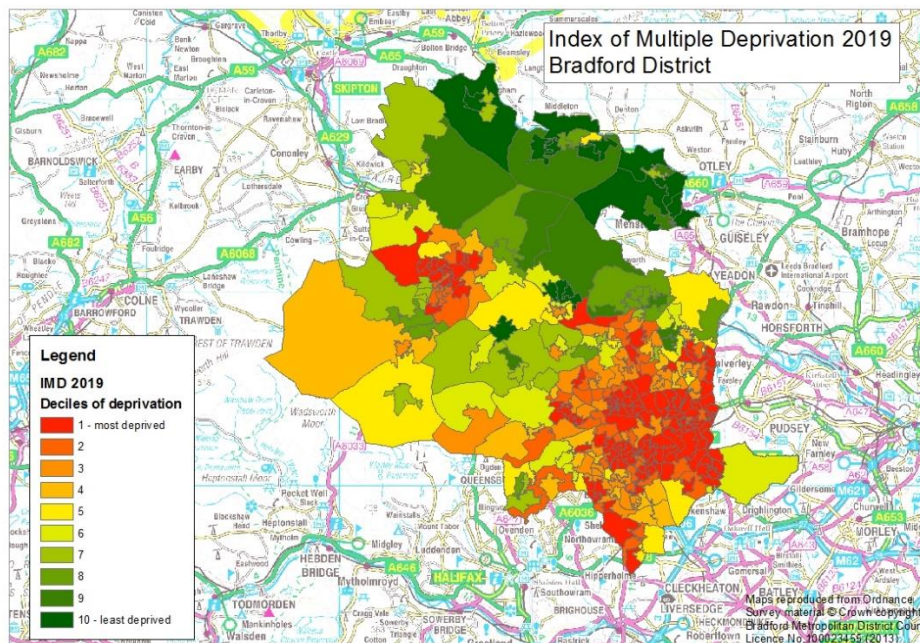

Life expectancy

In 2018-20 life expectancy at birth for females living in Queensbury was lower than the District average and for males was equivalent to the District average. Manningham ward had the lowest life expectancy rate for males and females. Wharfedale ward had the highest life expectancy rates for males and females.

Deprivation

The following map shows Lower Super Output Areas (LSOAs) ranked by deciles of deprivation. More deprived neighbourhoods are shown in red and less deprived neighbourhoods are shown in green.

The Indices of Deprivation 2019 were published in September 2019 at district and lower layer super output area. The indices are calculated using 39 separate indicators, organised across seven distinct domains of deprivation (income, employment, education skills and training, health deprivation and disability, crime, barriers to housing and services and living environment) which are weighted and combined to calculate the Index of Multiple Deprivation 2019.

The results have now been aggregated to ward level and this shows that 14 of the District's wards are amongst the 10% most deprived wards in England and one ward is amongst the 10% least deprived wards in England. Manningham is consistently the most deprived ward for

most of the indices and Wharfedale is consistently the least deprived ward for most of the indices.

Queensbury is ranked 22nd out of 30 wards where 1 is the most deprived and 30 is the least deprived. Queensbury is in 23rd place for income deprivation, 22nd place for employment deprivation and 21st place for education, skills and training deprivation.

More about deprivation

The data about deprivation has been aggregated to ward level. Although this data provides a description of the District's wards, this description does not apply to every person who lives there. Many non-deprived people live in deprived areas, and many deprived people live in non-deprived areas.
